

The Beebe Bulletin

My First Day of School

By: Nainy

First, I woke up early to get ready to go to school. I felt excited to meet my new teacher and my new class. My new class was cool! I Love my teacher because she is really nice. My first day of school was awesome. I can't wait to go back to school tomorrow!!! When school was over, I went home and told my mom, dad, and brother all the fun I had. I told my whole family how much fun I had at school. My family was proud of me. My parents asked me if I made any friends, I said yes. I told my dad I made four friends. My parents also asked what I learned today and I told them I learned a lot and it was also fun.

Meet Ms. Pi!

Ms. Pi is one of the new second grade teachers here at the Beebe. Although she is from New Jersey, Ms. Pi studied and got her Massachusetts teacher training at Boston College. At the age of 23, Ms. Pi has already earned a Master's degree in Early Childhood Education and speaks three languages fluently. She loves to travel the world! She has already been to Asia and Europe, and has more travel plans in the future. Ms. Pi is a wonderful addition to the Beebe School.

The New Health Teacher

I'm Devon Pattershall, I am the new traveling health teacher for the Beebe, Forestdale, and Ferryway Schools. I previously worked in Lowell as a preschool/Pre-K Teacher, and in Andover as an ABA Counselor. Before switching into education, I spent four years in the nursing field. I currently live in Lowell and enjoy taking barre class, hiking, kayaking, and spending time with friends and family. I am excited to be joining the Malden Public School System and look forward to getting to know you all and your students.

What is happening in Grade 7 By: Jordyn

In Grade 7 this year, we are learning lots of new things. In math, we just finished learning adding and subtracting of integers and are currently learning multiplication and division of integers. In ELA, we are learning text features and what they are used for and how important they are. In science, we are learning about how to write a proper claim and hypothesis. In social studies, we are learning about prehistory and the five groups of hominids. In Grade 7, we have to be in school at 7:45 a.m. and have two exploratory classes. A lot is happening in Grade 7 at one time and we are up for the challenge!

The Beebe School Grade 8 Happenings

By: Juliana & Christel

The grade 8 team of teachers have been working hard to teach the students helpful information for their future. First, in Social Studies directed by Mr. Enwright, we are working on creating our maps that were described by “Crispin the Cross of Lead”, by Avi. We are working on a project in social studies which is creating a map of Stromford Village; this is where Crispin lives. If you ever get the book Crispin, it describes the Village. The 8th grade students are now trying to represent this on our maps as clearly as possible. In math, Mrs. Byrne has taught us four different transformations on our grid paper; learning to move our figures and coordinates. In English, taught by Ms. O'Bryan, we are learning to edit our essays. Our class has recently finished our “This I Believe” essays, which explains our beliefs in life. In Mr. Carpenito’s science class, we have finished reviewing density and are moving onto chemistry, creating notes to help us process the chemistry content. Most of the grade 8 students started at the Beebe, since kindergarten, and now we are the role models for the younger students, like we used to be. We would like to have a great last year with the Beebe, remember all the good memories, and never forget anyone!
