Welcome Mrs. McCarthy's Kindergarten Class

By: Hadjar & Ciera

Last week, we had a chance to talk to one of our Kindergarten teachers, Mrs. McCarthy. We were able to ask her some questions, about learning, and about her students.

First we asked her, "Do the students seem to be enjoying Kindergarten so far?" Mrs. McCarthy replied with, "Yes, they really seem to love kindergarten! Most of them come in with a smiling face, very excited about activities, and they all seemed to have made many friends so far."

We then decided to ask her about her curriculum. "What topics are you planning on covering with your students this year?" She responded with, "I am hoping for all of them to know how to read by the end of the year, as well as knowing their addition and subtraction. At the moment, we are working on letters, and sounds, as well as counting."

As you know, many students, learn at different paces, so we decided to ask her about teaching different learning styles. How do you teach to different skill levels?

"I make lessons that have lots of hands-on activities.

Finally, we asked her that we all know that playing as a kid is fun but what does Mrs. McCarthy think of this? "Do you believe that playing games, and using toys are important at their age?" Well, she replied, "I think playing is very important hands-on activities that builds hand and eye coordination, playing also builds social skills and interactions with other children."

Before we concluded the interview, we decided to ask 5 students, a simple question. "Do you like Kindergarten so far and what's your favorite part of school?" "Yes, I really like computer class," Ayoub replied. "Yes, I really like Choice time," Vachi said. "Yes, Computer class is my favorite part of the school," Wesley answered.

"Yes, my favorite part of school is Choice time," Bianca responded. "Yes, Computer class is my favorite class," Robert answered. This concludes our Interview with Mrs. McCarthy and the Kindergarteners. Thank you students and Mrs. McCarthy!

The Cereal Box Project

By: Kyleigh

The 8th grade is doing a fun and creative project in science class! We were assigned to create a cereal box with the help of the periodic table. The students are supposed to pick an element from the periodic table, decorate it, and come up with a creative name for the cereal that relates to the element we chose! The cereal box should include all different facts about the element, and finally to make the cereal box complete, we are even going to include a surprise inside the box!

4th Grade Answers... WOULD YOU RATHER!?

Would you rather be...

**A Famous
Inventor**

**A Famous
Author**

"I would rather be a famous inventor because you can create what you want and make it cool... also you can tell kids about famous inventors so they can be one someday!!!"

-Christaleen G.

"I rather be a famous inventor because you can create useful things and you can fix problems also you can create something that writes on a piece of paper so you can also be a writer."

-Layla M.

"I would rather be a famous writer because I love writing about me or animals. If you were an inventor you need to work all day."

-Cassidy C.

"I would rather be a famous inventor. My first reason is that I can change how people live. My second reason is that I can help people. The last reason is that people can live better."

-Derek Y.

"I want to be a famous writer because I love to write a lot that is why ELA is my favorite subject in school."

-Abby T.

"I would rather be a famous inventor because I am very creative and if I have something in my head and it hits me, I make my invention or something creative that comes to mind, so that is why I want to be a famous inventor."

-Annas M.

Mr. Workman Interview By: Jordyn

The Beebe School has a new 7th grade Social Studies teacher so I thought it would be cool to get his thoughts on teaching.

Mr. Workman grew up in Malden and likes to draw. He also played baseball in High School. He believes in making History fun so that students are engaged and motivated to learn. He has a strength of patience which is good because that means you won't get mad easily. He wants to pass on knowledge and see kids grow and improve.

Digital Citizenship Week 10/14-10/19

With some help from Clicky, Netty, Webster, and the rest of the Netsmartz Crew, our elementary scholars learned about how to be safe online. Let's recap what we learned:

1. We don't share any personal information online.
2. If we see something that makes us feel sad, uncomfortable, or scared, we should tell a trusted adult.
3. Using good online manners is called Netiquette. If someone is not using good netiquette, we should ignore them or tell a trusted adult.

This Year's Beebe Buck System

By: Elina, Jarita, and Elise

We are starting off this year with a student support system called PBIS. PBIS is a positive behavior support system. If you are a kind, accepting, and responsible student as well as helping a teacher or a student you will receive a beebe buck.

We place our Beebe Bucks in a container in our homerooms. Once we reach the end of the month, we have a 30 minute assembly that showcases which class has the most beebe bucks in each grade. We have a raffle at the end of the assembly to see who would get chosen and they would receive a special prize.

The class with the highest number of Beebe Bucks are rewarded with the B.A.R.K bone (which stands for Be Accepting, Responsible, and Kind) bone. The B.A.R.K bone stays in that class' homeroom for a month. Of course, students will receive prizes at the assembly too! Last month three names were picked to receive stuffed animals, pencils, etc. ten names are also picked and students could get either a pizza certificate or kids-meal panera ticket.

This month every class voted on a name that they would like our Bulldog to have. Then the PBIS team placed the names voted from each class and prepared a google form for all the students in the school to vote on. We can't wait to find out what our Beebe Bulldogs name will be! Stay tuned!

Diwali Celebration Brings Light to First Grade
By: Ms. Malone

Mrs. Malone's and Mrs. Hollinhead's first grade class welcomed Mrs. Roy, a parent of one of their students, into their classroom to teach a lesson on the holiday Diwali celebrated in India. Mrs. Roy did a powerpoint presentation teaching the children about Diwali, the Festival of Lights. The class learned that Diwali is a holiday that celebrates good over evil and light over darkness. Homes are decorated with colorful lamps and bright lights. Fireworks can be seen in the beautiful night sky. People send cards to friends and give gifts to family. During Diwali people buy new clothes and jewelry, and also decorate their homes with Rangoli decorations which is a colorful floor

design made with paint, colored powder, and flower petals. The children were so excited to learn that Diwali, like holidays in many other cultures, is celebrated in similar ways.

Stem Week With Grade 7
By: Ms. Morrison

Happy S.T.E.M. week!! This week we celebrate S.T.E.M. For those who don't know what S.T.E.M. means, it's an acronym for Science, Technology, Engineering and Math. This is the week that we acknowledge and explore all the amazing careers, and opportunities that these disciplines offer. The Beebe 7th graders celebrated S.T.E.M. week with several Instagram Challenges that focused on the work done within the science, technology and engineering fields. Try this challenge!! **Instagram Challenge Palooza!!! # 2 STEM - Technology** The students also participated in a very "cool" Dry Ice lab to cap off the week!! Can't wait for S.T.E.M. week to come around again next year!!

**Second Grade goes on a
Field Trip... to a field.**

**Second Grade went to
Brooksby Farm this past
month and a few friends
from Ms. Pi's class wanted
to share their experiences.**

“At Brooksby Farm my favorite was when I went to the park because I went on the seesaw and fed the animals green beans. The animals I saw were goats, emus, sheep, pony and donkey. I learned that you can't hold the pumpkin stem because it will break.”

-Ellen

“At Brooksby Farm I learned that the goat eats green beans and how to hold a pumpkin. I will never forget the bee got into someone's juice and going to the bus. My favorite part was to eat food and play at the park. I did not like the smell of the farm and feeding the goat/donkey/pony/lama.’

-Louis

At Brooksby Farm my favorite part was everything. I like this because it was fun and cool and beautiful and funny too.... We did not go apple picking. I was a little sad but I loved it. So much that I was loving it though. When we went to the animal feeding I was so happy.

-Leandra
