## MANAGEMENT REVIEW

- PK-8; and the transition into Grade 9
- Coordination of district curriculum and instruction, school-to-school transitions, professional development, and in general the effective use of educational space (PK-8 schools v. alternative grade groupings?)
- Comment upon adequacy of leadership structure, management staffing, coordination efforts/strategies, and management resources as they relate to service delivery to students and families

## METHODOLOGY

- Online survey of selected professional staff (34 responses + 5 additional responses from PK-8 principals)
- Follow-up interviews (32 plus 4 School Committee volunteers) with 6 principals and ELC Director; 9 Assistant Principals; 14 Directors including 2 Assistant Directors of Special Education; Superintendent and Assistant Superintendent

## ABBREVIATED VERSIONS OF QUESTIONS

- Many educationally-successful school districts have a curriculum which generally follows a planned K-12 path in the core academic areas, including Common Curriculum Maps, Common Student assessments, Analysis of Assessment Results, and Professional Development as needed. Please indicate the degree to which you believe the following practices are currently in place for the curriculum which you supervise, where $1=$ not in place at this time; 2 = sometimes occurs; 3 = occurs in about $50 \%$ of instances; $4=$ occurs most of the time; $5=$ occurs almost always
- The strengths/successes of my job responsibilities are:
- The challenges of my job responsibilities are:
- If I were to make one suggestion for strengthening Malden's support for classroom instruction and curriculum leadership, it would be:

## SOME HELPFUL COMMENTS AND QUOTATIONS

- The teachers have been just great; diligently focusing and working hard on behalf of Malden students during a time of great educational change and uncertainty.
- There needs to be a stronger K-12 alignment, and especially at Grades 5-6 and 8-9.
- In some areas, programs we currently use no longer complement state standards [especially since the introduction of the Common Core].
- SPED follows the curriculum maps developed by the general education content areas with modifications made in pacing and/or content [if the general educating curriculum needs alignment, the already difficult tasks in Special Education are made more difficult].

## SOME HELPFUL COMMENTS AND QUOTATIONS

- Over the last couple of years, professional development has been driven by mandates, and very little time has been dedicated to content, curriculum mapping, or best practices.
- Some [curriculum] areas are further along than others...this can be directly linked to the leadership of the specific content areas [and in those areas where the Common Core requires the most changes such as the assignment o Math topics to different grade levels than before]. Some content areas also lack a clear leader district wide, i.e. music, art, [foreign languages].
- Encourage data driven discussion at the district and school level to set specific goals for instruction. The evaluation tool is a framework for these discussions; right now its implementation is the focus. It may take next year to step back and connect it to common language and specific areas of need for teachers and students.

## SOME HELPFUL COMMENTS AND QUOTATIONS

-Continue to develop pacing guides and supply the materials needed to meet the rigors of Common Core.
-We need to adhere to a standards-based curriculum, which is aligned to the Common Core and provide opportunities for all students to excel. Directors and principals need to work collaboratively to be sure teachers get the needed support for continued student achievement and opportunities to lead and share their work...where expectations and supports are system-wide, but principals and teachers are able to decide the best path for their students.
-Have specific administrators responsible for curriculum leadership and allows [other] administrators to focus on building safety and student behavior.

## THREE OPTIONS FOR ASSIGNING GRADES K-8

## OPTION A: Five K-8 schools - as presently organized

Advantages as reported in education research:
-Students may obtain stronger educational success by attending the same buildings for nine years, becoming well-known to the faculty, and eliminating educational setbacks due to transitions among buildings.
-Families, for several years, can focus upon the same school and faculty, a factor often leading to increased family involvement and support in children's schooling.
-Teachers often get to know families and children in greater depth, a factor enhancing student achievement, as a teacher of an older child can seek advice from a teacher who successfully taught the child at a younger grade level.

## FIVE K-8 SCHOOLS (continued)

- K-8 schools often report improved attendance and fewer behavior issues (than would otherwise occur) as the school takes on a "family" or "community" atmosphere with older children acting as helpers or mentors for younger children.
- K-8 schools in urban districts sometimes report stronger student scores on academic tests due to less student mobility/fewer transfers. For example, in recent years Boston has reported an annual student transfer rate of $9.5 \%$ in its K-8 schools, compared with $17 \%$ transfers in middle schools.

## FIVE K-8 SCHOOLS (continued - 2)

## Disadvantages:

- Over time, unintended differences have developed in the curriculum opportunities offered to students in the five K-8 schools (for example; opportunities to study a Foreign Language). In turn, these differences have created difficulties for instructional planning at the high school level, making it more difficult for students to academic success in some areas. The underlying cause is not so much the $\mathrm{K}-8$ grouping, as it is a consequence of extending school-site-based decisions into the area of curriculum planning.

## OPTION B: Four K-6 Schools; one Grade 7-8 School

Advantages:
Helps to quickly coordinate the Grade 7-8 curriculum in one school; "the way it use to be"

Disadvantages:
Adds an extra transition (Gr. 6-7); families may have children in different schools; all elementary schools subject to re-districting ; a building with only two grades has a high probability (especially among early adolescents) of adding disciplinary issues, and may achieve less academic success (see Silverman, Crisis in the Classroom); present Grade 5-6 curriculum issues not addressed

## OPTION C: Three K-5 Schools; two Grade 6-8 Schools (one small, one larger)

Advantages:
Helps to coordinate Grade 6-8 curriculum in two schools instead of five; better chance of success than with a single two-grade school

Disadvantages:
Adds an extra transition (see disadvantages in Option B); families may have children in different schools; all elementary schools subject to redistricting; K-5 schools are likely to have substantial over-crowding due to inefficient use of space

## How long would it take to convert from the K-8 model to some different form of grade grouping?

- It takes a minimum of two full years to study, plan the details, and accomplish the changes. Thus even if Malden were to make a commitment quickly, the fall of 2015-16 would be the earliest that a smooth transition could be expected.
- Bristol, CT took almost five years to phase in the changes. "District Z" in this report is making changes over 3-5 years. "District $X$ ", due to extreme financial pressure, had to make the change in just over 12 months and experienced difficulty (in the community, among families, in student confusion, and in some educational outcomes). Educational research documents the extensive time required for the planning of successful grade regrouping (see Byrnes and Ruby 2007 re Philadelphia).

## PROGRAM CHANGES = DECREASED BUILDING CAPACITY

ELEMENTARY: THEN (40-50 years ago) NOW

| Classrooms | $500-600$ sq. ft.; <br> desks in rows; no water | 900+ sq. ft.; learning centers; in-class <br> library; sink and drinking fountain in <br> room (primary grade toilets) |
| :--- | :--- | :--- |
| Kindergarten | None, or half-day; <br> in standard classroom | Full-day; 1,000+ sq. ft.; toilets, sink and <br> drinking fountain, etc.; some preschool |
| Technology | None | In classrooms and Computer Lab |
| Science | In classroom | Separate Science Room |
| Art/Music | In classroom | Separate Art/Music Rooms; <br> $1,200-1,500$ sq. ft.; spec. equip. |
| Library | Depository for books | Books, computers, media major <br> curriculum support; Library Science <br> instruction |

[^0]ELEMENTARY (cont'd): THEN NOW

| Special <br> Education | Possibly separate <br> classroom, few students <br> in school | Included in some regular classes, <br> plus many small instruction spaces; <br> additional staff, assistive <br> technology, wheelchairs; OT/PT <br> requires gross motor equipment; <br> parent conferences require space |
| :--- | :--- | :--- |
| Handicapped- <br> Accessibility | Little or no <br> accommodations were <br> made | All areas of the school must be <br> handicapped-accessible |
| Transportation | Some bused, but most <br> children walked or rode <br> bicycles to school | Most children ride buses or are <br> driven to school |
| Security | Buildings unlocked; not a <br> major concern | Schools are secured; outside <br> phones for parent and emergency <br> calls |
| Storage | Little needed | Schools use many educational <br> materials; space required |

| Junior High Departments; <br> Students move throughout building | Middle School Teams, <br> students remain in home base wing for <br> most classes |
| :--- | :--- |
| $500-600$ sq. ft. classrooms | $900-1,000$ sq. ft. student projects; <br> In-class computers/library |
| Science Labs in one area | Lab in each team area |
| SPED in separate room, few students | Included in regular classes, small <br> instruction rooms; parent conferences <br> required |
| Library a depository for books | Books plus computers and other <br> media; major curriculum support; <br> Library Science instruction |
