SNOW DAY POLICY

NRT Bus, Inc. provides School transportation to students in a number of Cities and Towns in Massachusetts. During the winter months bad weather may cause School cancellations.

There are two possible scenarios which affect the transportation that our Company provides to students:

- We will not transport a student who **attends** a School in a City or Town which has cancelled their Public Schools for the day.

This means that the City or Town has determined that the conditions in that area are not considered safe for students to travel to Schools in their area.

There may be Private or Collaborative Schools in that City or Town which do not fall under the Public School System. If we transport students that go to a School which is open in a City or town who's Public Schools are closed due to weather, we will not transport them that day for safety reasons.

- We will not transport a student who **lives** in a City or Town that has cancelled their Public Schools for the day.

A student may attend a school which is in a different City or Town from where they reside.

If the Public Schools are closed in the City or Town that a student resides in, the conditions are not considered safe for students to travel to school.

We will not transport the student that day for safety reasons even if their School is open.

This policy helps to ensure the safety of our students, drivers, and monitors.
