

Malden Public Schools Out-of-School Time (MOST) November 2021 Beebe, Forestdale, Linden & Salemwood Schools

Beebe

Written by Sanuga, a MOST
5th-grade student

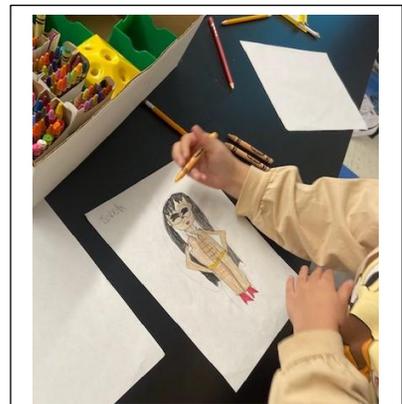

“I think one of the highlights of November is probably going to be the engineering project. The engineering project was a multi-step project where we made an elevator using syringes, popsicle sticks, and copper wires to make an elevator. The activity was fun because we got to make our own elevator and we got to partner up. I partnered up with one of my best friends. The MOST program is a pretty fun program and we do lots of fun stuff here so if you want to join, you can!”

Salemwood

This month has been jam-packed with amazing events! We started the month off with some fantastic *fall activities* and then took some time out to *honor our heroes and local veterans*. We made star shaped thank yous, wrote letters, and mailed them to the **Chelsea Soldiers Home**. This was a lesson that the kids were quite proud of! Another student favorite was designing their own animated characters thanks to **Media Art in the City's (UMA)** introduction workshop on character creation.

Chinese Culture Connection

In November, our little dragons had so much fun with balloons! In science class, mixing baking soda and vinegar to blow up balloons was one of their favorites. We also made cute balloon dogs in different colors. During our signature Chinese class, our kids learned how to name fruits and colors, and had fun with making their fruits. They enjoyed singing in Chinese and if you walk in the hallway, you can always hear the gracious melody!

The MOST Program in partnership with the **Malden YMCA and YWCA** co-sponsored the activity portion of the **City of Malden Public Health & Human Services Department's** 3 night student vaccination clinic at the Ferryway School. Students got backpacks filled with prizes and had a chance to enter the nightly raffle. Healthy snacks & Curious Creatures were also part of the fun!

MOST students at Salemwood packing bags!

Forestdale

During the month of November at Forestdale we explored our imagination, textures, colors, friendship, kindness, and appreciation. We learned about the wild west and how to be cowboys. We tapped into our competitive sides and played *Minute to Win It* games the next week, just like the real television show! We spent plenty of time celebrating the harvest season and Thanksgiving. We also made turkeys out of coffee filters and clothespins, and decorated them with markers that we later diluted in rose water to create new tones. In addition to our turkeys, we also wrote thank you cards to our loved ones and made cornucopias. We ended the month of November with a Pirate theme using paper plates, pipe cleaners, and tissue paper to explore our imagination and create colorful ships. We had a great time this month at Forestdale!

Linden STEAM Academy

November was a month full of *fall crafts, engineering*, and good vibes at Linden MOST! Students created fall tissue paper trees, learned about turkeys, and wove God Eyes' out of yarn. We researched the mechanics of catapults and then built our own. Some students participated in *Cooking Club* and learned kitchen basics while others studied *Stop Motion Animation*. Every Friday, students in the *Recycling Club* help the school recycle reusable waste.
